

Fact Sheet

Water Charges 2010/11

Access Charges

Access charges will be variable depending on meter connection size – see table.

For example, the Access Charge for a 40mm service is not just double that of a 20mm service as the capacity of a 40mm service is four (4) times greater than that of a 20mm service. Therefore a 40mm service can draw four times the amount of water than a 20mm service. Another example is a 200mm service can draw 100 times the amount of water of a 20mm service.

For multiple flats or units that only have a single meter into the property, each flat/unit is charged with a 20mm access charge as though they had a meter and each receive the full consumption tier structure.

Properties with a dedicated fire line will be charged separately for this line at equivalent of 20mm service.

Consumption Charges

Residential customers will be charged on a three tier consumption charge:

- Up to 300kL
- 301 – 600 kL
- 600 kL

Each tier of allocation is applied cumulatively over a 12 month period, i.e. you will be charged for all of your 300kL tier one usage first, regardless of how long during the 12 months it takes you to use that 300kL. Following use of that 300kL you will then be charged at the next tier charge.

Non-residential customers will be charged on a single tier Non-Residential consumption Charge.

Fact Sheet

Water Charges 2010/11

	Rockhampton	Capricorn Coast	Gracemere	Mount Morgan	Ogmore	Marlborough	Caves
Residential Consumption Charges							
1kL to 300kL	\$0.57/kL	\$0.59/kL	\$0.81/kL	\$0.58/kL	\$0.66/kL	\$0.66/kL	\$0.60/kL
301kL to 600kL	\$0.88/kL	\$0.92/kL	\$0.88/kL	\$0.89/kL	\$1.03/kL	\$1.03/kL	\$1.01/kL
